Fruit Punch

Why have fifteen fruit blends when you only need one good one! We have found the magic combination of citrus, berry and hibiscus spice which we promise not to tinker with!!

Lemon and Ginger

This is an interesting blend, the longer you leave it to brew the spicier it gets. What starts off as a light ginger kick turns into quite the warmer after ten minutes

Chai Tea

This blend will give you some caffeine and a robust spiciness that'll keep you on your toes. We have recently added more cardamom and toned down the ginger
